Overview

The investment universe is comprised mainly of Commonwealth Government Bonds, Semi-Government Bonds, Inflation Derivatives, Interest Rate Derivatives, Bank Bills and Negotiable Certificates of Deposit (NCDs) issued by larger Australian banks. The Fund may have up to 25% exposure to direct offshore Government Bonds and may opportunistically have an allocation of 15% to Investment-Grade Corporate Bonds. In addition, the fund may also use derivatives to gain additional exposure to Non-Australian interest rates.

Fortlake Asset Management aims to hedge any foreign currency exposure back to the Australian dollar.
